

Aditya Ammar Al Haqqi

Full-stack Developer

Sleman, Yogyakarta | +62 895 3661 17068 | adityaammar65@gmail.com |
github.com/Adityammar65 | aditya-ammar.vercel.app

Professional Summary

Informatics Management student at Universitas Amikom Yogyakarta with a strong interest in web application development. Experienced in building responsive and database-driven applications using Laravel, PHP, JavaScript, Tailwind CSS, and MySQL through academic and personal projects. Passionate about writing clean, maintainable code, solving technical problems, and continuously learning modern web technologies. Seeking an opportunity to contribute, grow, and develop practical experience as a Junior Web Developer.

Core Skills

Programming Languages

- JavaScript
- PHP
- Python
- C++
- Bash shell scripting

Frameworks & Libraries

- Laravel
- CodeIgniter
- Bootstrap
- Tailwind CSS
- React.js
- Chart.js
- Streamlit

Databases

- MySQL
- Supabase

Tools & Technologies

- Git
- GitHub
- Visual Studio Code
- Figma
- Linux Operating System

Technical Projects

Garage64, Diecast E-Commerce Website

<https://github.com/Adityammar65/Garage64>

Project Type: Academic Project

Position: Backend Developer

Tech Stack: *Laravel 12 | PHP 8.2 | Tailwind CSS 4 | MySQL | Vite | Git*

Description:

Garage64 is a web-based e-commerce application developed for managing and selling diecast products. The system provides product management, user authentication, shopping cart, checkout, and transaction management through an intuitive and responsive interface. The application was built using the Laravel framework following the MVC architecture and integrated with a MySQL relational database.

Key Responsibilities:

- Designed and implemented the relational database structure.
- Developed RESTful backend functionalities using Laravel.
- Implemented user authentication and authorization.
- Built CRUD modules for products, categories, and transactions.
- Developed shopping cart and checkout functionalities.
- Integrated backend logic with frontend views using Blade and Tailwind CSS.

FindSrv, Freelance Service Marketplace Website

<https://github.com/Adityammar65/FindSrv>

Project Type: Academic Project

Position: Backend focused Developer

Tech Stack: *CodeIgniter 4 | PHP 8.2 | Bootstrap 5 | MySQL | Git*

Description:

FindSrv is a web-based freelance service marketplace designed to connect customers with service providers across various categories. The platform enables users to browse services, manage user accounts, submit service requests, and streamline communication between clients and providers. The application was developed using the CodeIgniter 4 framework with a structured MVC architecture and a MySQL relational database.

Key Responsibilities:

- Designed and developed homepage, login, and register view.
- Designed and developed service form view.
- Designed and implemented the relational database schema.
- Developed backend modules using CodeIgniter 4 following the MVC architecture.
- Implemented user authentication and role-based access control.
- Built CRUD functionalities for services, categories, users, and transactions.
- Developed business logic for service requests and order management.
- Integrated backend functionalities with responsive frontend interfaces using Bootstrap.

FilmKu, Movie Recommendation Web Application

<https://github.com/Adityammar65/FilmKu>

Project Type: Academic Project

Position: Backend Developer

Tech Stack: *Streamlit | Python 3.12 | Supabase | Git*

Description:

FilmKu is a web-based movie recommendation application that helps users discover movies based on selected preferences. The application integrates a Streamlit interface with a Supabase database to provide an interactive and user-friendly experience while demonstrating data management and recommendation features.

Key Responsibilities:

- Designed and managed the Supabase database.
- Developed backend logic using Python.
- Implemented movie search and recommendation features.
- Integrated Streamlit with Supabase.
- Managed CRUD operations for movie data.
- Developed interactive web interfaces using Streamlit.

Kania Tour & Travel, Tour and Travel Management Website

<https://github.com/Adityammar65/Kania-Tour-Travel>

Project Type: Personal Project

Position: Frontend Developer

Tech Stack: *HTML5 | Bootstrap 5 | JavaScript | Git*

Description:

Kania Tour & Travel is a responsive company profile website developed to present car rental services and tour packages. The website provides essential business information, service offerings, vehicle collections, tour package details, and contact information through a clean and user-friendly interface.

Key Responsibilities:

- Developed responsive frontend pages using HTML, CSS, and Bootstrap.
- Implemented interactive user interface components with JavaScript.
- Built layouts for the home page, service pages, vehicle listings, and tour package pages.
- Ensured responsive design across desktop and mobile devices.

Personal Portfolio Website

aditya-ammar.vercel.app

Project Type: Personal Project

Position: Frontend Developer

Tech Stack: *React.js | JavaScript XML | Tailwind CSS 4 | Vite | Git*

Description:

A responsive personal portfolio website developed to showcase technical skills, featured projects, certifications, and professional background. The application emphasizes clean design, responsive layouts, and modern frontend development practices while providing recruiters with an overview of projects and technical expertise.

Key Responsibilities:

- Designed and developed a responsive portfolio interface.
- Implemented reusable React components.
- Built responsive layouts using Tailwind CSS.
- Optimized navigation and user experience.
- Integrated project showcase with GitHub repositories.
- Maintained the project using Git version control.

Experience

Laboratory Teaching Assistant

Web Programming Fundamentals & Object-Oriented Programming

Universitas Amikom Yogyakarta | April 2026 - July 2026

Responsibility:

- Assisted lecturers during practical laboratory sessions for Web Programming Fundamentals and Object-Oriented Programming courses.
- Guided students in understanding programming concepts, debugging code, and completing practical assignments.
- Provided technical support during laboratory activities and ensured students followed best coding practices.
- Evaluated practical assignments and provided constructive feedback to improve students' programming skills.
- Collaborated with lecturers and fellow teaching assistants to prepare learning materials and practical exercises.

Education

Universitas Amikom Yogyakarta

Diploma of Information Management | 2024 - Present

GPA: 3.86 (Current)

Relevant Coursework:

- Web Programming
- Object-Oriented Programming
- Database Systems
- Data Structures and Algorithms
- Software Engineering
- System Analysis and Design
- Network Engineering

Certificates

Code Generation and Optimization Using IBM Granite

IBM SkillsBuild | Hacktiv8 | 2025

Gained practical knowledge of AI assisted code generation and optimization techniques using IBM Granite models to improve code quality, maintainability, and development efficiency.

View Credential:

https://drive.google.com/file/d/1LE-1kqMRxFY-kioYgcNU6_LJQNWF7IUN/view?usp=drive_link

https://drive.google.com/file/d/1eIHp0jVSrzcVNs5Fd6yi-7_WEDALnIo/view?usp=drive_link

IBM Granite Models for Software Development

IBM SkillsBuild | 2025

Learned how to leverage IBM Granite foundation models to support software development tasks, including code generation, code explanation, debugging, and productivity enhancement using generative AI.

View Credential:
