Summary

Informatics Management Diploma student at Amikom University Yogyakarta with a strong interest in full-stack web development. Experienced in building web applications using Laravel, React, CodeIgniter, PHP, JavaScript, MySQL, and Tailwind CSS through academic and personal projects. Currently serving as a Teaching Assistant for Web Programming and Object-Oriented Programming. Eager to contribute technical skills and continuously grow as a Full-Stack Web Developer.

Experience

University of Amikom Yogyakarta	Yogyakarta, Indonesia
Teaching Assistant	April 2026 - July 2026

Assisted students in Web Programming and Object-Oriented Programming laboratory sessions, evaluated programming assignments, and provided technical guidance while supporting lecturers in practical learning activities.

Education

University of Amikom Yogyakarta	Diploma • GPA: 3.86
Informatics Management	Yogyakarta, Indonesia • 2024 - Present

Projects

InTerminal	2026
Built an interactive terminal simulator using React and Vite to help users learn command-line operations. Implemented a virtual file system, command execution engine, command history, and support for Windows terminal commands.	
Garage64	2026
Developed a full-stack e-commerce website for diecast collectibles using Laravel, MySQL, and Tailwind CSS. Implemented product management, shopping cart, online payment integration, sales reporting, and responsive user interfaces.	
FindSrv	2025
Developed a web-based service marketplace using CodeIgniter 4, Bootstrap, and MySQL. Implemented user authentication, service listings, database management, and responsive interfaces for customers and service providers.
